

Dynasty Signs Partner Agreement With U.K.'s Finsoft Limited

MONTREAL -- (MARKET WIRE) -- 04/24/2006 -- Dynasty Gaming Inc. (TSX-V: DNY), a provider of unique gaming software for online casino and sports book operators, today announced that it has signed a partnership agreement, through its Mahjong Systems Limited subsidiary, with Finsoft Limited covering the distribution of Dynasty's Mahjong Mania software. Dynasty holds a lead position within the international online gaming sector by virtue of its first-to-market, aggregate play, cash-wager version of Mahjong.

Finsoft is one of the world's leading experts in real-time transaction and information management systems. Over more than seven years it has successfully provided its MarginMaker[™] transaction solution to some of the world's largest sports betting operators including Stan James, Betfred and Sportingbet. The inclusion of Mahjong Mania software in Finsoft's product range will extend its ability to serve these clients. Dynasty will earn licensing fees and revenue from each gaming network on which Finsoft installs Mahjong Mania software.

Mahjong Mania offers the only aggregate, play-for-money Mahjong game available for Internet use. With the online gaming industry, there is growing recognition that Mahjong may overtake Poker given that hundreds of millions of people, particularly in Asia, are already engaged in a free-play version of the game.

Mahjong Mania President Adriaan Brink said, "We regard the signing of our agreement with Finsoft as a significant further step in the expansion of our global market for our aggregate-play, cash wager version of Mahjong. To date we have signed individual licensing agreements with nine online casinos and sports betting operators. Today's announcement comes only days after Dynasty announced that, together with Ho Group, it would organize and sponsor the first World Cup of Mahjong tournament in Macau during December of this year."

Predrag Popovic, Chief Executive of Finsoft, commented, "Our business has achieved success because we are continually able to provide our expanding base of clients with transaction and information management products that allow sports book clients to more efficiently handle increased volumes of activity. The integration with Mahjong Mania is important not only as an extension of our product offering but also because it enables us to serve the increasing demand for online gaming."

The TSX Venture Exchange does not accept responsibility for the adequacy or accuracy of this news release.

About Dynasty Gaming Inc.

Dynasty Gaming Inc. is solidifying a two-phased strategy to secure a lead position in the Chinese market and within the international online gaming sector with its first-to-market software for an aggregate player, cash wager version of Mahjong, the world's most played game. Through its wholly owned subsidiaries, the company develops, markets, licenses and supports the Mahjong Mania software. Since marketing began in the second half of 2005, a number of license agreements have been signed including a contract with Ladbrokes, the world's largest online sports book (www.Ladbrokes.com) whose site now hosts a customized version of Mahjong Mania. Dynasty has also signed Golden Palace one of the largest on-line casinos operators. Dynasty Gaming's 77 million common shares, issued and outstanding, are widely held by Canadian and U.S. investors. Full information on Dynasty Gaming can be found at www.dynastygaming.com.

About Finsoft

Established in 1995, Finsoft is a worldwide specialist software solutions provider and systems integrator. Expertise originally perfected in Investment Banking and now applied to the Betting and Gaming industry.

create MarginMaker™, the world's leading enterprise-wide, real-time, transaction processing and risk management platform for all major delivery channels and types of betting. Finsoft has over 140 staff worldwide with major offices in London, Belgrade and Singapore, from which it serves some of the world largest and most innovative gaming companies including Sportingbet, Stan James and Paddy Power.

Today, every betting enterprise needs to price markets and make trading decisions based on real-time evaluation of its liabilities. Finsoft's up-to-the-minute techniques offer the punter the opportunity to bet from the most convenient access channel and for the bookmaker to monitor and manage the company's entire business from a global field-book, leading ultimately to better service, higher margins and reduced costs.
